Hazardous Materials and Dangerous Goods – Optimizing Processes and Ensuring Legal Conformity

Have you ever faced this?
There is a wide range of materials in your company, but you lack an overview of which ones must be declared as hazardous materials and how to store them in a legally compliant manner. You are confronted with various regulations regarding hazardous materials and face a major challenge in complying with the large number of regulations.
Your company ships dangerous goods, and you need to avoid fines for non-compliance in the shipping process. You feel overwhelmed by complex requirements for the labeling of dangerous goods and therefore have high costs and efforts for qualifying staff. Often, shipper's declarations for the shipment of dangerous goods pose a significant challenge for you.

Our expert knowledge for your business
TAMOYA Dangerous Goods enables a safe hazardous materials management and legally compliant storage of hazardous substances. In the shipping process, the solution is the right decision for you for safe and legally conform shipping of dangerous goods. TAMOYA also simplifies the handling of dangerous goods data and document management. Both functionalities, hazardous materials management and dangerous goods shipping, integrate seamlessly into your SAP system landscape.

All-in-one solution

for handling hazardous materials and shipping dangerous goods

Hazardous Materials –
On the safe side with TAMOYA

In the warehouse, TAMOYA supports you in the management and storage of hazardous materials. For instance, TAMOYA simplifies your work and eliminates non-value adding activities for you by taking over the electronic dispatch of material safety data sheets, CLP labelling, SCIP submissions, and mapping the European REACH regulation.

Dangerous Goods –
Let TAMOYA do the work for you

TAMOYA Dangerous Goods supports you best when shipping dangerous goods. How? Constantly revised regulations such as ADR, IATA, and IMDG define what is considered as dangerous goods and how to process them correctly. For this reason, it is essential to have a software solution that incorporates changes to these regulations and maintains these changes in your SAP system. This means you can not only reliably optimize your packaging, labelling, and shipping processes, but also significantly minimize risks.
