TAMOYA

Future-Proof Your Shipping Logistics – Unleash the Power of Seamless Shipping

Efficient shipping logistics processes – the foundation of your company's success

Quick responses and efficient shipping logistics are vital for sustained competitiveness. However, increasingly complex shipping and the wide range of service providers complicate processes. Separate software for each CEP service provider leads to inefficiency, whereas integrating different solutions with SAP often falls short and lacks transparency. With a seamless SAP integration and a variety of modules, TAMOYA is the answer to these challenges.

TAMOYA stands for improved speed, quality, and service in shipping

Our software streamlines key processes, from shipment creation and packing to tracking – directly integrated into SAP. Say goodbye to manual processes like calculating freight costs and researching how to track & trace your shipments for each carrier – say hello to automated shipping processes.

TAMOYA integrates CEP and transportation service provider information, freight cost calculation, and shipment tracking directly in SAP. It provides intuitive tools for packing and weighing optimizations, safe and secure dangerous goods management, address validation for your shipments, and powerful foreign trade functionalities.

100 %

Integration into SAP

Four Modules – One Solution

Developed for Meeting All Your Shipping Logistics Needs

Powerful carrier integration, automated shipment processing

The carrier integration module of TAMOYA enables a seamless shipping experience between your business and more than 150 international CEP and transportation service providers like UPS, DHL, and FedEx. It allows you to directly handle all shipping processes based on the chosen shipping carrier. TAMOYA makes carrier-specific automated shipping label printing and freight cost calculation, address validation, and document creation & processing possible.

On the safe side with TAMOYA Dangerous Goods

TAMOYA supports you in a secure hazardous materials management and in safe and legally compliant shipping of dangerous goods. It automates processes for the identification, proper labeling, and shipping of relevant materials and goods for you directly in SAP. For your convenience, changes to international regulations such as ADR, IATA, and IMDG can be provided hassle free via update.

100%

of the TAMOYA modules can
be integrated seamlessly
with each other

Optimize your packing and weighing processes

TAMOYA helps you to eliminate manual efforts and focus on the value-adding activities at your packing station. This is made possible by the handling of multi-delivery consignments, fast processing functions, scanner optimization, and an overall improved user experience. With the scale adapter, electronic scales can be connected directly to SAP. TAMOYA can address several scales from different manufacturers and can provide more information than weight such as the calibration memory number.

Save manual effort with TAMOYA Foreign Trade

Sanction list check, export control, export declaration – no problem at all for TAMOYA Foreign Trade. The module takes over the obligation to check business partners against the various sanction lists. It can also perform export control supporting users in the assessment of materials in order to recognize, check and manage possible export restrictions. From German Customs export declarations with data import from invoices to the management of customs documents received – TAMOYA enables a complete SAP integration.

100%

Legally compliant shipping
of dangerous goods

You won't even notice it's there – unless you look for it

TAMOYA integrates seamlessly into your existing SAP landscape to the extent that you might think it is not even there. All functionalities of TAMOYA such as the carrier integration are designed and developed to automate processes in the background for you. Powerful delivery statistics, runtime reports, and many more possibilities for reporting and tracking make your shipping processes truly transparent and integrated into SAP. You can now use the resources you have freed up for your core business. This way, you save both costs and time.

A bonus: If changes are made to the interface of a service provider or in the SAP standard, the TAMOYA modules are updated accordingly.

Our goal: Streamlining shipping processes

At TAMOYA, we have a deep commitment to innovation and excellence. Offering you a comprehensive solution tailored to meet the evolving shipping logistics needs of internationally operating companies, we draw from over 15 years of industry expertise. TAMOYA stands for improved speed, quality and service in shipping. Since the existing IT solutions could not optimally represent the processing of shipping processes, NTT DATA Business Solutions has developed TAMOYA. All running business processes are easily and effectively integrated into your SAP system. What you get are delivery statistics, runtimes and many more possibilities for reporting and tracking that make your shipping logistics processes even more efficient.

What makes TAMOYA so special

- Automated shipment processing from SAP ERP/ SAP S/4HANA/ SAP EWM/TM
- Integrated address validation of business partners and consignees
- Efficient packing and weighing modules
- Precise sanctions list check directly from SAP
