Why NTT DATA Business Solutions?

- Automated creation of the necessary shipper's declarations and mapping in the SAP system
- Efficient logistics processes through improved controls and increased transparency
- Check for packed / loaded dangerous goods

WMSE

“

For the demanding dispatch handling of dangerous goods, we needed a modern solution integrated in SAP that accelerates our processes and safely implements them in accordance with regulatory standards. With TAMOYA Dangerous Goods*, NTT DATA offers us comprehensive functions that convince us all along the line.

*Editorial change with regard to the changed product name

Thomas Zahn
Deputy IT Manager, WM SE

Challenges

- Demanding logistics processes with regard to hazardous goods
- Manual creation of transport documents and high costs for individual shipping processes
- Compliance with and review of regulatory standards for shipping dangerous goods

Benefits

- Automated creation of necessary shipper's declarations and integration into the SAP system
- Simple dispatch of dangerous goods for road freight (ADR) with checking of the 1,000 point rule, sea freight (IMDG) and air freight (IATA)
- Efficient logistics processes thanks to improved monitoring and increased transparency
- Improvement of master data and workflows
- Significant reduction in manual effort
- Maintenance and checking of the legally required packaging instructions
- Check for packed / loaded dangerous goods

Solutions
